

# 1999 INTERNATIONAL FINANCIAL SCALE

The following chart alphabetically lists 215 countries and territories. For each country or territory the national average Per Capita Income (PCI) is listed in US dollars. This figure has been obtained by averaging the economic data from: 1999 World Almanac (September 1998) and 1998 Internet CIA Factbook (37th year). Finally, each country is assigned to one of three categories based on the PCI. They are:

Category C = countries or territories with a PCI between US\$0 and US\$4,000.

Category B = countries or territories with a PCI between US\$4,001 and \$10,000.

Category A = countries or territories with a PCI of more than US\$10,001.
